HARI SIMRAN KHALSA

OPERATIONS LEADERSHIP | SYSTEMS & IMPLEMENTATION | CONTINUOUS IMPROVEMENT

Dublin, Ohio | hkhalsa095@gmail.com | https://sfskhalsa101.github.io/hari-simran-khalsa-portfolio/

PROFILE

Operations and systems leader with 5+ years across parcel distribution, dispatch, manufacturing logistics, and software delivery. Managed and developed supervisors, led 70+ employees, and coordinated 70 drivers; delivered measurable improvements in quality, labor utilization, and transportation costs. Builds practical tools that connect frontline requirements with clear data and operational decisions.

CORE CAPABILITIES

Team leadership & coaching • Workforce planning • Continuous improvement • Dispatch & route planning • Quality & service KPIs • TMS/WMS workflows • Excel • SQL • Power BI • Python • FastAPI • PostgreSQL • AWS • Docker

OPERATIONS LEADERSHIP

FedEx | Operations Supervisor

June 2026–Present | Plain City, Ohio

- Developed fellow supervisors and trainers by providing resources on production standards, work methods, translated instructions, and operational documentation.
- Helped build a culture of accountability by administering discipline and recognizing and rewarding employees through QRP.
- Earned tugger certification and work on developing and training new drivers.
- Develop trainers to run their areas with clear escalation paths, private coaching, and recognition of strong performance.
- Completed all FedEx QDM courses; support injury reporting and operational documentation.

UPS | Dispatch & Building Automation Supervisor

January 2023–May 2024

- Coordinated 70 drivers across multiple municipalities, managing route priorities, dispatch disruptions, and real-time service adjustments.
- Generated approximately $86,000 in estimated annual logistics savings through route optimization and workflow improvements.
- Reduced overtime by 20% through workforce balancing and transportation planning.
- Monitored automated sort-system conditions and belt/PLC controls, coordinating driver communication and service recovery when operating conditions changed.

UPS | Operations Supervisor

August 2020–December 2022

- Led 70+ employees in high-volume package distribution, overseeing labor allocation, scheduling, payroll, quality, safety, and employee development.
- Managed and developed UPS supervisors who advanced into full-time driver supervisor and dispatch supervisor roles.
- Reduced daily misloads from approximately 100 to fewer than 10 in three months through process improvement and frontline coaching.
- That reduction represents approximately $1.17M in estimated annualized cost avoidance: 90 fewer misloads/day × UPS's internal $50-per-misload cost figure × 260 operating days.
- Led operations supporting Pfizer COVID-19 vaccine distribution with zero distribution failures and 100% chain-of-custody integrity.
- Maintained operating continuity through COVID-era peak conditions while managing attendance, performance coaching, and corrective action.

MANUFACTURING, SYSTEMS & PRODUCT DELIVERY

Hidaka USA | TMS/WMS Specialist & Shipping Associate

2026

- Supported manufacturing logistics through outbound freight, receiving, inventory movement, and production coordination using transportation and warehouse workflows.
- Maintained zero shipping and quality errors over three months.
- Implemented workflow improvements producing approximately $2,000 in weekly savings.
- Worked with blueprints, press-brake processes, and forklift operations to support accurate production and material movement.

Security Flaw Solutions | Founder & Lead Developer

2025–2026

- Built, deployed, and sold AIncident, an AI-powered incident-reporting SaaS product, through Flippa for $4,995.
- Owned requirements, development, deployment, and commercialization; delivered role-based access, GPT summaries, PDF reporting, and Stripe subscription billing.
- Built reporting workflows with Python, FastAPI, PostgreSQL, and Streamlit, with AWS and Docker deployment experience.
- Used AI-assisted development alongside troubleshooting and operational requirements analysis to turn a reporting need into a delivered commercial product.

Schneider / Kroger Implementation | Transportation Planning & Systems Integration — SFS Contract

September–November 2025

- Contracted through Security Flaw Solutions to support implementation of Schneider’s new Kroger account and critical food-shipment operations.
- Supported integration of Schneider transportation data with Kroger’s legacy load database for order creation, lane mapping, and data synchronization.
- Coordinated fleet dispatch, scheduling, shipment tracking, and operational reporting; resolved scheduling conflicts and maintained transportation documentation.

Target | Security Specialist, Asset Protection

2024–2025

- Contributed to an 11% reduction in shrink through theft/fraud investigation, evidence collection, and case documentation.
- Set a regional record with six apprehensions in one shift.
- Worked with TrueEye and TruScan automated skip-scan detection workflows; coordinated with law enforcement and maintained safety standards.

SELECTED TECHNICAL PROJECTS

FlowCheck: Python/SQL WMS–TMS reconciliation with validation, idempotent batches, and audit evidence. ShiftLens: reproducible SQL analysis, Power BI measures, and an interactive warehouse KPI dashboard. Sort planner and dispatch dashboard: synthetic-data tools for staffing and exception review.

EDUCATION & DEVELOPMENT

University of Cincinnati — Mechanical Engineering coursework
Hilliard Davidson High School — High School Diploma
Certified Forklift Operator • All FedEx QDM courses completed • IBM AI Engineering certificate in progress
